

Invest in your health

Schedule your preventive screening at no cost to you

Take advantage of a preventive health screening worth more than \$300 at no cost to you. The screening includes blood work, a health risk appraisal, height and weight measurements, a blood pressure check and lipid panels. You can share your confidential results with your doctor to eliminate the need for retesting. Identifying health issues early can really save you money. So register today.

This benefit is provided to employees, retirees, COBRA subscribers and their covered spouses, and former spouses if their primary coverage is the Standard Plan or the Savings Plan.

Some screening providers might provide more results above the minimum requirements. Participating screening providers might also offer optional tests for an extra fee. You can contact the screening provider about out-of-pocket expenses associated with these tests. Note: optional tests can vary based on screening provider.

Three ways to get a screening:

1. Host a worksite screening

Anyone can schedule a screening at their office. Simply complete the request form and return it to PEBA. Forms are located at **PEBAperks.com**. There is a 20-person minimum for worksite screenings.

2. Attend a regional screening

Intended for retirees, covered spouses and those who missed their worksite screening, regional screenings are available throughout the year. Registration for regional screenings is available online at **peba.sc.gov/events**.

3. Visit a participating screening provider

Schedule your screening at your own convenience. A list of participating providers across the state is available online at **PEBAperks.com**.
